SUMMARY

Fullstack Software Engineer and Technical Team Lead with 3+ years of experience designing and launching enterprise web applications. Proven track record in **.NET Core** and **Angular** development, API design, and team mentorship. Adept at building scalable tools such as form builders, video training platforms, and fulfillment workflows. Passionate about system design, code quality, and solving complex business challenges. Pursuing a B.S. in Computer Science.

EXPERIENCE

Fullstack Software Engineer & Team Lead

Nov. 2021 – Present

Hobby Lobby

Oklahoma City, OK

- Improved performance of an internal video training platform by optimizing **SQL** queries and implementing client-side video caching in **Angular**, significantly reducing load times and improving usability for thousands of daily users.
- Modernized a 20+ year-old nameplate ordering tool, improving usability, and reducing ordering time for internal users across 1000+ stores.
- Architected and implemented a RuleSet & Rule engine to manage item applicability across stores, resolving longstanding data discrepancies and improving ordering logic accuracy.
- Engineered a dynamic form builder using **Angular** reactive forms and **.NET** APIs for internal auditing workflows, supporting complex questionnaire templates with conditional logic.
- Developed the audit client application used in retail stores to conduct audits via tablets and iPads, streamlining the in-store auditing process and enabling real-time questionnaire execution.
- Mentored junior developers and collaborated with product and business stakeholders to deliver scalable, high-impact internal tools.

EDUCATION

Oregon State University

Bachelor of Science in Computer Science

Oklahoma City Community College

Associate of Science in Computer Science

Fullstack Academy

Certificate in Software Web Development

Canadian Valley Technology Center

Computer Information & Systems

PROJECTS

Dadify | E-Commerce App | *PostgreSQL, Express, React*

- Built a secure fullstack web store with authentication, cart logic, and modular API endpoints.
- Early project showcasing modern React + REST principles and backend integration.

Fitness Trac.kr | Workout Tracker | *PostgreSQL, Express, React*

- Designed dynamic dashboards and API routes for workout logging and user routines.
- Focused on UI/UX and performance tuning of back-end data retrieval.

TECHNICAL SKILLS

Languages: C#, C++, Java, SQL, JavaScript/TypeScript, Python, HTML/CSS

Frameworks & Libraries: Angular, .NET Core, React, Next, Express, Bootstrap

Developer Tools: Git, Visual Studio, SSMS
